

Product Technical Data Sheet

Form No.: FTP-166 Rev.: A

Product Name: SteriTec US Container Card

Product Type: Process Indicator

SteriTec Reorder Number: CI 135

Description: The SteriTec US Container Card is a steam sterilization process indicator designed for use with various types of sterilization containers. The Container Cards will function in sterilizers that operate at 121° C or 132° C. It provides a visible confirmation that the instrument container being sterilized has been exposed to steam sterilization processing.

Performance Characteristics:

When exposed to steam sterilization conditions, the bar changes color.

Color Change: White to Black

Complete Color Change Time: 10 minutes +/-1 min at 121° C
2.5 minutes +/-30 sec at 132° C

Indicator Stability: Excellent Before and After Exposure

Physical Characteristics:

The card can fit in various container card-holders by folding or not folding the top sizing flap to the appropriate size.

Background Print Color: Black/Gray

Dimensions: 1.531" W X 2.75" L or with flap folded down 1.4" W X 2.75" L

Substrate Material: 80 lb Cover

Units / Box: 500

Boxes/Case: 6

Selling Unit: Case

Environmental Limitations:

Storage: 50° – 100° F (10° – 38° C) at 30-60% humidity

Shelf Life: 3 years from date of manufacture.

SteriTec FDA 510(k) Release to Market Date: March 12, 1996 K955426

Standards Classifications:

AAMI ST60, Class 1

EN 867-1, Class A

ISO 11140-1, Class 1
